

Foot Care

ANATOMICAL SILICONE INSOLE

DESCRIPTION

BALANCE, COMFORT, DESIGN & A SCENT OF POSITIVE ENERGY IN EVERY STOP YOU TAKE!

Not just another insole but a state of art

Longtime standing at work, hitting the gym and perhaps a concert in the evening? For those of you who keep a fast pace throughout the day, Christou 1910 silicone insoles will become your new favorite healthy habit for your feet! With 100% medical grade pure silicone, anatomically designed to embrace the foot, our hypoallergenic insoles provide support to the three basic points of the sole: the heel, foot arch and metatarsal. By absorbing the shocks and the pressure that our body weight exerts on the joints and the spine, they protect your knees, hips and waist from injuries, prevent calluses and corns, and help you stand, walk and exercise more efficiently and more comfortably! They can be handwashed with lukewarm water and soap and can be used over and over without losing their shape and efficiency.

AROMA PLANTS

Enriched with the aroma notes of bergamot, orange blossom and cedar wood, they leave a unique scent of freshness and energy on your feet and shoes, which can instantly make your day!

DID YOU KNOW?

A slight disorder on your foot movement can at times lead to problems in the upper joints of the body, causing pain and distress in the knees, hips and lower back. So listen to your body and seek the appropriate solution!
