

## Foot Care

# BUNION CUSHION WITH BIO - ORGANIC ESSENTIAL OILS

### DESCRIPTION

#### A PROTECTIVE FILM FOR YOUR BUNION!

What about this bunion! How come a small bone like that causes such pain? In order to make the life of those with a bunion much easier, Christou 1910 has designed this soft aid, which aligns the big toe and does not permit toes to overlap. Creating a protective film over the protruding bone, the pressure and abrasion from the shoes is reduced and the area becomes pain free. How is that? Through our one of a kind innovation: a healing combination of medical grade bio-organic essential oils (the purest you can find in nature) are released onto the skin in just 2' from the moment you put on the aid. Having a unique analgesic, relaxing, healing and anti-inflammatory function, provided by Mother Nature, the pain from the bunion is soothed letting your sole soft and cool in the appropriate position. It can be worn with any kind of shoes and it is hand washed in cold water.

### ESSENTIAL OIL PROPERTIES

#### BALSAM

Certified essential oil of the Greek fauna and specifically originated in Parnonas. An oil with the most potent effect in wounds and inflammation. Analgesic, powerful in healing and regenerating the skin, muscle toner, it can soothe in a unique way bone and muscle inflammation.

#### KAOLINITE

It enables all the healing processes of the skin, regulates its PH and acts topically on irritations.

### TIP

Bio-organic essential oils are living, natural extracts with a given life span. Every time they come in contact with your skin the patch releases its remedial mix, which is absorbed immediately through the foot's skin. Regular use of the patches helps the problematic area heal, and relieves it from pain immediately, while receiving the maximum therapeutic potential of the essential oils, which act not only as a spa but also as a natural painkiller in the area. Forget all about pain the moment you put it on.
